

SINGAPORE RADIOLOGICAL SOCIETY NEWSLETTER

ISSUE 2 | 2019 | WWW.SRS.ORG.SG

WELCOME MESSAGE FROM THE SECRETARY

Dear friends,

As we usher into 2019, 2018 seems like a distant memory amidst the busy start to the new year. Looking back, we are pleased to report that 2018 has been a busy and fruitful year for the society. Recapping the second half of 2018, our notable events included the very well received SRS movie night held on 16 June 2018. "Incredibles 2" allowed the coming together of our families, providing our members a unique opportunity to know each other outside of professional engagements. Judging from the response, many will be pleased to know that we will be organising another movie night this year to keep this family networking alive. Right after this, we held the "Resident's Night" at Burlamacco on 26th July 2018. Equally popular, it was a multi-disciplinary affair as radiology, nuclear medicine and radiation oncology residents came together to mingle and share their journeys over an evening of food and drinks. The last social event of our calendar was our inaugural timepiece themed "Social Night" which happened on 8 Nov. Held at Cortina Watch located at the Capitol Piazza, we had the unique opportunity to come together to connect over timepiece discovery. Special thanks to Wee Thong for having taken the time to make these 3 events happen!

Recapping 2018 would be incomplete without mentioning Radiology Asia 2018, where we welcomed and hosted a record 1640 participants. I will leave you to read the details from Steven's report in this edition of the newsletter. There is however no time to rest on our laurels as preparations for our next ASM are firmly in full gear. If you haven't realised, we have rebranded our ASM entirely to the "Singapore Congress of Radiology (SGCR)". This will be held in conjunction with "Workshops in Interventional Radiology Education Singapore (WIRES)" and the 19th Congress of the ASEAN Association of Radiology from 15-17 August 2019. Details can also be found in this newsletter on the subsequent pages.

Looking forward, the next key event of the year has to be our AGM on 30th March. Do come as we share the progress the society has made over the last year and elect the office bearers for the next year! I look forward to seeing you around at one (or more) of the many events planned this year

Warmest Regards,

Dr Francis Ho

Honorary Secretary
on behalf of the SRS EXCO

Radiology ^{Asia}

May 19 – 20, 2017 | MAX Atria @ Singapore EXPO

Radiology Asia 2018 was held from the 11th to the 13th of May 2018 at Singapore Expo. The theme for this year was "Beyond the ABCs of Radiology", focussing on Abdominal, Breast and Chest radiology. We were honoured to invite renowned faculty from American Roentgen Ray Society (ARRS), Asian Society of Abdominal Radiology (ASAR), Society of Imaging Informatics in Medicine (SIIM), the American Institute for Radiologic Pathology, Medical Ultrasound Society of Singapore (MUSS), I2R from A*STAR, and all the major hospitals in Singapore.

The Gala dinner, held at Hotel Fort Canning, was again the hallmark event for the local Radiology fraternity. Dr V J Sethi and Dr Robert Kwok were conferred the SRS Gold Medals and we had the honour of inviting Prof Francis Hui to give the 2018 FY Khoo memorial lecture. This year we also awarded the inaugural CRS Gold medal to the top performing Resident in the exit exam, Dr Wendy Cheong.

Minister Gan Kim Yong was the Guest of Honour for the event.

The meeting attracted a record total 1640 participants with 25% increase in the number of delegates from the year before. Several of the workshops such as Breast Intervention workshop were oversubscribed, and we garnered overwhelmingly positive feedback from both delegates and industrial exhibitors alike. A total of six workshops were held over the course of the conference.

We would like to express our sincere gratitude to our RadAsia 2018 team, various heads of department, both in the public and private sectors, for their strong support by allowing their staff time off their perennially busy schedules to attend the event. Finally, we trust that all of you found the social networking and scientific exchange at RadiologyAsia 2018 fruitful in every possible way.

Singapore Congress of Radiology (SGCR) &
Workshops in Interventional Radiology Education Singapore (WIRES)

in conjunction with

19th Congress of the ASEAN Association of Radiology

**SINGAPORE CONGRESS OF RADIOLOGY (SGCR) & WORKSHOPS IN
INTERVENTIONAL RADIOLOGY EDUCATION SINGAPORE (WIRES)
IN CONJUNCTION WITH
19TH CONGRESS OF THE ASEAN ASSOCIATION OF RADIOLOGY**

15-17 AUGUST 2019

Dear friends and colleagues,

On behalf of the Singapore Radiological Society and College of Radiologists, it is our privilege to invite you to participate in the Singapore Congress of Radiology (SGCR) & Workshops in Interventional Radiology Education Singapore (WIRES), to be held in conjunction with 19th Congress of the ASEAN Association of Radiology from 15-17 August 2019.

This will be the only local Scientific Congress and Annual Meeting organised by the Singapore Radiological Society and College of Radiologists Singapore and endorsed by the leading International Radiology Societies and Organisations this year. It is also well supported by the largest industry players and brands in medical imaging.

The congress theme is "Image. Intervene. Innovate.", with a primary focus on oncologic imaging and therapy. It will also have major tracks on neuroradiology, head and neck imaging as well as the role of artificial and machine Intelligence, which are the current topics of interest in the field of medical imaging.

Raffles City Convention Centre

SGCR & WIRES 2019 will be held at the Raffles City Convention Centre, Singapore. Located in heart of the city, it is a top-notch destination for meetings and congresses, with excellent hospitality, promising a wonderful experience for delegates. In addition to the strong scientific content, the meeting will provide ample opportunities to meet and network with fellow professionals to foster future collaborations.
